

Lensmeter LM-10DX

Serving Your Vision

Lensmeter LM-10DX

“Find a point of eco-environment for our future”

- 1 The light source changed from a conventional electric bulb type to an LED type which decreases CO₂ emission and also reduces the electric power consumption.
- 2 The cross-line pinhole type target enables accurate measurement.
- 3 Internal power reading
- 4 The analog type can measure a subtle difference in lens power that is not possible with a digital type.

Specifications

Vertex Power	Range : +25 to -25D Step 0.125D up to $\pm 3D$ / 0.25D beyond $\pm 3D$
Prismatic power	Range 5 Δ (in a visual field)/20 Δ (with a compensator) Step 1 Δ
Cylindrical axis	Range : 0° to 180° Step 1°
Measurable lens diameter	Range : $\varnothing 20\text{mm}$ to $\varnothing 80\text{mm}$ Cross-line pinhole type
Eyepiece focusing	+6D to -6D
Tilting angle	30° to 90°
Power source	AC100-240V
Power consumption	1.0VA
Dimension	380(H) \times 403(D) \times 180(W)mm
Weight	4.9kg

* If you want to order the unit without prism compensator, please contact our sales department.
